

CHILDREN SUFFER BECAUSE OF HIGH GAS, WOMEN SAY

Must Economize in Heating
and Cooking—Bronx Co.
Hearing Goes Over.

Although no evidence was taken today on the application of the Bronx Gas and Electric Company for increased rates the Public Service Commission heard statements from two representatives of the consumers attacking the company for its attitude. In informal statements, off the record, Mrs. Harvey G. Ebeling, No. 1366

Gray Street, and Mary J. Lee, No. 1233 Franklin Avenue, declared the present \$1.50 rate of the company worked a serious injury on the consumers, most of whom are families of the poorer class of workmen. Children, they said, were the particular victims, as gas had to be saved in heating and cooking because of the increasing bills. The company now needs to charge \$1.70 a thousand cubic feet.

Chairman Prendergast, after stating that no member of the commission would be able to hold hearings in the next two weeks, adjourned the case to Sept. 12, after which continuous hearings will be held. This case will run along simultaneously with the New York and Queens Gas Company's application for higher rates.

Mr. Prendergast announced that when this latter case is resumed the commission will examine its witnesses first, after which the city and then the consumers will present their direct cases. The commission, it was announced, is now engaged in its own appraisal of the company's plant and in a check up of the figures presented by the company's witnesses.

ARMY AVIATORS DEVELOP AIR PHOTOS IN FLIGHT.

Now Attempt Will Be Made to
Print Before Landing, Too.

WASHINGTON, Aug. 17.—A successful experiment in photography from the air, which is regarded by aviation officials as possessing possibilities of high military value, has just been conducted by the Army Air Service. A photographer flew from Bolling Field to Camp Meade and returned a few minutes later with a plate already developed showing clearly the parade of students attending the citizens' training course there.

The plate was developed in the air and ready for printing when the plane returned to the field. Experiments will be conducted in printing the photographs in the air also.

Staten Island Man Killed by Train.

MIDDLETOWN, N. Y., Aug. 17.—Frederick F. A. Behme, seventy-two years of age, of No. 88 Lockman Avenue, Mariners Harbor, Staten Island, was instantly killed at Red Hill, Sullivan County, by an Ontario and Western train. He was an engineer on a Staten Island ferry boat and was spending his vacation at his son's home.

BANK TELLER, GIRL AND \$75,000 GONE.

President of Denver Institution
Tells of Shortage.

DENVER, Aug. 17.—Edwin F. Morse, until Saturday first paying teller in the International Trust Company, is missing. With him, according to city detectives, are \$75,000 and a girl, Mabel Penfold, who until a month ago was a clerk in the same bank.

"Morse fled with the cash Saturday afternoon," John Evans, President of the bank, said. "He has been one of our trusted employees. We did not

FOUND DEAD IN SUBWAY.

Police Believe Unidentified Man
Fell From Rear of Train.

The body of a well-dressed man, not yet identified, was found early this morning in the Lexington Avenue subway north of the 116th Street station. The police think the man fell or jumped from the back of a train. In his pockets he had \$15, but nothing to identify him. A trackwalker, Alex. Wife, found the body.

PRICE 10 CENTS

Something You Can Be Proud Of

MOST people in the Metropolitan district are proud of New York and have a right to be.

Its size, its stores, its activity, its importance as a nation's port and a world metropolis are things worthy of pride.

But you can be proud of another thing perhaps more important than any of these.

The milk supply of New York City is the best in the world. A people's health centers around its milk supply.

Every student of the public health knows the importance of keeping the city's milk up to the highest standards.

The farmer doesn't ask any special favors for doing this. Once it was an ideal to be reached—now it is a standard to be maintained.

Remember, however, that he lies in no bed of roses in keeping that standard.

Sometimes, as in the case of the present summer, the unfavorable weather conditions added to the variable nature of the cow cause his costs to increase rapidly.

For the cow must get her rations regularly, and she doesn't gauge her supply of milk by the cost of feed, but by the quantity and quality.

As a result, the farmer must sell his milk to the dealer at a price which is below the cost of production.

The main point, however, is that he does send New York City milk that Dr. Copeland, Health Commissioner of the City, calls "The best milk in the world and the Cheapest at the Price."

After a Shower Bath Use

Boott Mills Absorbent Toweling

BUY Boott Mills Absorbent Toweling by the bolt. Cut into towel lengths and hem.

Keep a few of these towels in the locker at the boat house or club for use after a shower. They are comfortable and wipe dry.

The usefulness of Boott Toweling for every purpose in the home for which a towel is used has long been demonstrated. It is inexpensive, looks well, wears well, launders easily, and comes out bright white.

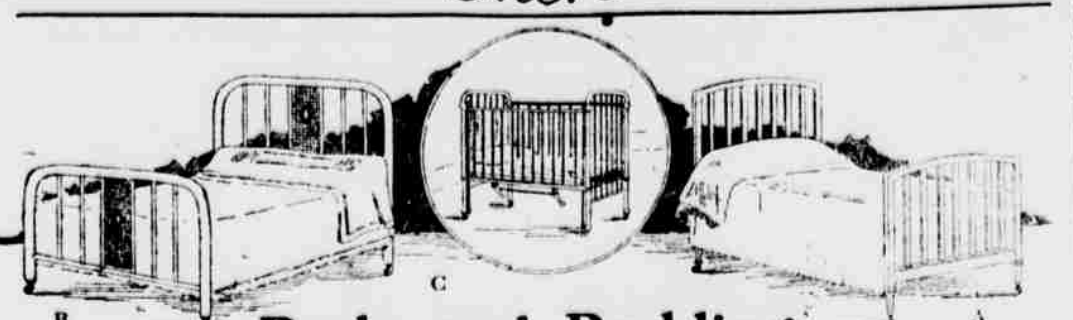

Any store selling white goods should have it.

Boott Toweling is 18 inches wide, and in 25- or 30-yard bolts.
